G3 series 3-3.5 Tons Dual-drive Battery Forklift Truck

With the increasingly strict environmental protection requirements and constantly upgrading road emission standards, we are in an era of farewell to "fuel". Electric forklift trucks have gradually become the main force in the field of logistics and transportation. Heli new G3 series dual drive electric forklift trucks inherit the brand-new family style design, explore new possibilities of truck color matching, offer a driving experience of zero emission and pure electric and open a new era of transportation.

High performance ensures high efficiency

Front wheel dual drive motors offer stronger power

Driving speed: 19-20km/h

Maximum gradeability with load: 20%

Maximum lifting speed with load: 0.44m/s

Maximum lifting speed without load: 0.54m/s

Good bearing capacity at high position

Multi Configuration, Low Energy Consumption

Independent steering system supplies oil for steering on demand and reduces truck energy consumption

The steering is more sensitive and energy-saving

LED light of the whole truck has high brightness, long life and is more energy saving

Low rolling resistance electric truck special solid tire reduces driving resistance consumption

Small Dimension, More Flexible

Narrow truck width is more suitable for narrow aisle application; Large angle steering axle makes the turning radius smaller satisfying the loading and unloading operation in narrow aisle.

USB power supply

Storage box

The mast with large opening offers good driving vision ensuring operation comfort and safety.

- P — Powerful
 - E — Economics
 - S — Energy saving
- Multi gears satisfy a variety of working conditions.

The multifunctional armrest integrates fingertip switch, direction switch, steering switch, PES gear, horn button, emergency power-off switch, etc., to realize convenient operation and precise control of electromagnetic proportion.

Fully suspended seat is more comfortable to drive.

Intelligent security protection

- **Intelligent automatic parking:** optimized negative braking system and active parking in multiple applications are safe and easy which is safe and easy to make up omissions;
- **Intelligent speed limit in different application:** multi application recognition and intelligent speed limit balance efficiency and safety;
- **Intelligent limit buffer:** intelligent induction of mast lifting and lowering avoids limit impact and is safe and comfortable;
- **Intelligent operation protection:** a full set of OPS system can avoid misoperation and ensure safety;
- **Intelligent control strategy:** dual core controller is in line with the latest EU safety requirements.

Steering automatic deceleration

Reliable Quality, Easy Maintenance

ZF electric drive axle integrates double AC motor, reducer, differential, oil cooled disc brake and has the features of high efficiency, low noise, maintenance free, reliable quality.

Battery side pulling changing way is easy to replace

Stamping integral roof design of overhead guard offers higher protection and there is no worry about working in rainy days;

Note:

The vertical axis stands for load capacity and the horizontal axis stands for load center which is calculated from the front surface of the forks to the gravity of the standard load. the standard load means a cubic with 1000mm edge length. When mast is tilted forward, using non-standard forks or loading large goods, the load capacity will be reduced. The load capacity of standard mast at different load center can be known from this load chart.

Standard configuration

Simple mast	Battery (with leakage hole, side-pulling, automatic water adding)
Standard fork	Smart instrument (ZAPI)
III triple mast	Steering wheel adaptive steer control
AC system	Steering automatic deceleration
OPS system	Performance mode control
Two piece electric proportional valve	DC converter
Fingertip switch	LED signal light
Full suspension seat	LED flickering warning light
Super elasticity solid tyre	USB power
Steering wheel with operation ball	Backward buzzer
Rearview mirror with wide angle in the middle	Exclusive key
Metric screw	HELI FICS (standard version)
HELI package	

Optional

Double mast/triple mast	Steering wheel without operation ball
Fork with other length	Left and right rear mirror
Side shifter	Fire extinguisher
Other attachment	Tilting cylinder, sleeve for steering cylinder
Hoses and pulley block	Speed limit
Three/four piece electric proportional valve	Custom-made color
Traceless tyre	Custom-made sticker
Cab/windshield glass	HOPPECKER battery
Air conditioner, fan	FAAM battery
Heater	LED rotating warning light, LED rotating buzzer warning light
Sweeper	Rear working light, blue light
SAE screw	Universal key
Neutral package	

Reliable special designed instrument

Reliable special meter display the whole truck's working condition, fault detect and other important information completely which make the operator master the whole truck condition directly and conveniently.
